Subject: FW: Progress Meeting No. 2 Agenda

I discussed the questions raised by ITI regarding design of the liner. Mike is in agreement with what you and I discussed, which is that unless there is some strong basis for utilizing a beam design approach, the use of a circular design approach is acceptable. As always though, it is still the responsibility of ITI/D'Allessandro to provide the design and the Certificate of Design.

Alan,

Did you get to talk to Mike about the liner?

Please forward me the name of the noise control co. you were referring to.

Jon
